

Abstract

The present invention relates to bicyclic compounds of general formula I,

in which

X, Y independently of one another are N or C-R⁴;

n is 1, 2, 3, 4 or 5;

10 R^a is halogen, cyano, C₁-C₆-alkyl, C₁-C₆-alkoxy, C₁-C₆-haloalkyl, C₁-C₆-haloalkoxy, C₂-C₆-alkenyl, C₂-C₆-alkenyloxy or C(O)R⁵;

R¹ is halogen, cyano, C₁-C₆-alkyl, C₁-C₆-haloalkyl, C₂-C₆-alkenyl, C₂-C₆-alkynyl, C₃-C₈-cycloalkyl which is optionally mono- or polysubstituted by alkyl and/or halogen, C₅-C₈-cycloalkenyl which is optionally mono- or polysubstituted by alkyl and/or halogen, OR⁶, SR⁶ or NR⁷R⁸;

15 R² is halogen, cyano, C₁-C₆-alkyl, C₁-C₆-haloalkyl, C₂-C₆-alkenyl, C₂-C₆-alkynyl, C₃-C₈-cycloalkyl which is optionally mono- or polysubstituted by alkyl and/or halogen, C₅-C₈-cycloalkenyl which is optionally mono- or polysubstituted by alkyl and/or halogen, OR⁶, SR⁶ or NR⁷R⁸;

20 R³ is hydrogen, C₁-C₆-alkyl, C₁-C₆-haloalkyl or C₃-C₆-cycloalkyl which is optionally mono- or polysubstituted by alkyl and/or halogen;

25 and the agriculturally acceptable salts of compounds I, plant protection agents, containing at least one compound of general formula I and/or one agriculturally-acceptable salt of I and at least one liquid or solid carrier substance, as well as a method for controlling phytopathogenic fungi.
